External Examiner

ACKNOWLEDGEMENT

This is a great opportunity to acknowledge and to thanks all those persons without whose support and help this project would have been impossible. We would like to add a few heartfelt words for the people who were part of this project in numerous ways.

I would like to thanks to my project guide “Mrs.A.M.Tank”, for her indefatigable guidance, valuable suggestion, moral support, constant encouragement and contribution of time for the successful completion of project work. I am very grateful to him, for providing all the facilities needed during the project development.

At the outset, I sincerely thank all faculty members of my institution for his extra effort to make our session on line inspire of all ideas. I thank my Counsellors for her indispensable support and encouragement thought the project.

I must also thanks to respected “Mrs.A.M.Tank” for her valuable suggestion while working on the project.

During these long days and night have been paramount in making this project a reality.

Nagbhushan S.Kumbar

INTRODUCTION

The main aim of developing this Music Portal System Java based web application, it's a collection of MP3 songs of different languages in one place where users can get based on the year also play and listen the songs on our website at free of cost only is to provide user friendly tool for music web sites.

This is one type of online music Player. Most of the websites now a day's Music products through online but download music files with free of cost makes problem with piracy so this is the best place to stop music piracy over the internet. Here the customer should log in through Music store website and play & Listen selected music files like songs, and private albums by using papal.

Then selected music files can be downloaded directly to the local system of the customer. The main advantage is it is user-friendly, provide us 24 hours customer service, and decrease the manual efforts and Time.

Existing User will login into our website by giving his user name & password into our Online Music System & access all the song as per his/her Requirement based on the language or year.

Is the new person who is coming to our Online Music System have to create an account on our website by giving his/her basic information like name first name email id phone no address with will be confident in our data base have to keep a user name & password for next login.

Music is probably more familiar than we might at first imagine. Indeed, nowadays it is all around us, whether it be in restaurants, supermarkets, lifts, for advertising or as theme and incident music on television. Hearing live music is one of the most pleasurable experiences available to human beings. The music sounds great, it feels great, and you get to watch the musicians as they create it.

No matter what kind of music you love, try listening to it live. There are lots of things to enjoy at a concert, lots of things to pay attention too. Your job is to be affected by the music, but you can be affected by what most appeals to you, or by whatever grabs your interest. Here are a few choices for what to listen to. Choose whatever you like, switch as often as you want, and feel free to add to the list.

Some things to enjoy in classical music, moods and feelings, loudness and softness, different speeds, instrument sounds melodies, rhythms, changes and transformations, beautiful performing, memories that get triggered, recognition of something heard earlier, visual images that come to mind.

EXISTING SYSTEM

We have many websites but we can't find all languages songs at only one website it's a time taking the process to find our required languages songs to find by using different websites and so many unwanted pop-ups coming in present websites with are misleading the users from the requirement of songs.

MODULES

- **ADMIN**

Admin will collect all the Data for Our Online Music System like Songs Names, Film Name, Language, Play Link, year of The Song & Store in Our Data Base

- **EXISTING USER**

Existing User will login into our website by giving his user name & password into our Online Music System & access all the song as per his/her Requirement based on the language or year...

- **NEW USER**

Is the new person who is coming to our Jaco Music Player have to create an account on our website by giving his/her basic information like name first name email id phone no address with will be confident in our data base have to keep a user name & password for next login.

PROPOSED SYSTEM

Our Jaco Music System Java predicated web application it's an accumulation of audio musical compositions of different languages in one place where users can get predicated on the year withal play and Listen the musical compositions on our website at free of cost only is to provide utilizes cordial implement for music web sites.

This is one type of online music Player. Most of the websites now a day's Music products through online but download music files with free of cost makes quandary with piracy so this is the best place to stop music piracy over the cyber world.

Here the customer should authenticate through Music store website and play & Listen culled music files like musical compositions, and private albums by utilizing papal. Then culled music files can be downloaded directly to the local system of the customer. The main advantage of this project is to utilize cordial, provide us 24 hours customer accommodation, and decrements the manual efforts and Time.

SYSTEM ANALYSIS :

FEASIBILITY STUDY

It looks at the financial aspects of the project. It determines whether the management has enough resources and budget to invest in the proposed system and the estimated time for the recovery of cost incurred. It also determines whether it is worthwhile to invest the money in the proposed project. Economic feasibility is determined by the means of cost benefit analysis. The proposed system is economically feasible because the cost involved in purchasing the hardware and the software are within approachable. The personal cost like salaries of employees hired are also nominal, because working in this system need not required a highly qualified professional. The operating-environment costs are marginal. The less time involved also helped in its economic feasibility. It was observed that the organization has already using computers for other purpose, so that there is no additional cost to be incurred for adding this system to its computers. The backend required for storing other details is also the same database that is Oracle. The computers in the organization are highly sophisticated and don't needs extra components to load the software. Hence the organization can implement the new system without any additional expenditure. Hence, it is economically feasible. The result of the feasibility study is a formal proposal. This is simply report-a formal document detailing the nature and the scope of the proposed solution. The proposals summarize what is

ECONOMIC FEASIBILITY :-

Economic analysis is the most frequently used method for evaluating the effectiveness of a candidate system. More determine the benefits and the saving that are expressed from a candidate system and compare those costs. If benefits outweigh costs. Otherwise, further justification or alterations in the proposed system will have to be made if it is to have a chance of being approved. This is an effort that improves in accuracy at each phase of the system life cycle.

TECHNICAL FEASIBILITY :-

Technical feasibility centre on the existing computer system hardware etc. and to what extent it can support the proposed addition. For example, if the current computer is operating at 80% capacity - an arbitrary ceiling – then running another application could over load the system or require additional hardware. This involves financial consideration to accommodate technical enhancements. If the budget is a serious constraint then the project is judged not feasible.

OPERATIONAL FEASIBILITY :-

It is common knowledge that computer installations have something to do with turnover, transfers, retraining and changes in employee job status. Therefore, it is understandable that the introduction of a candidate system requires special efforts to educate, sell, and train the staff on new ways of conducting business.

HARDWARE & SOFTWARE REQUIREMENT

Sofrware Requirements :

Front End :

- **Java**

Back End :

- **Oracle**

Operating System :

- **Windows 7**

Hardware Requirements :

Processor :

- **Intel Core i3 1.73GHz**

RAM :

- **4 GB**

Hard Disk :

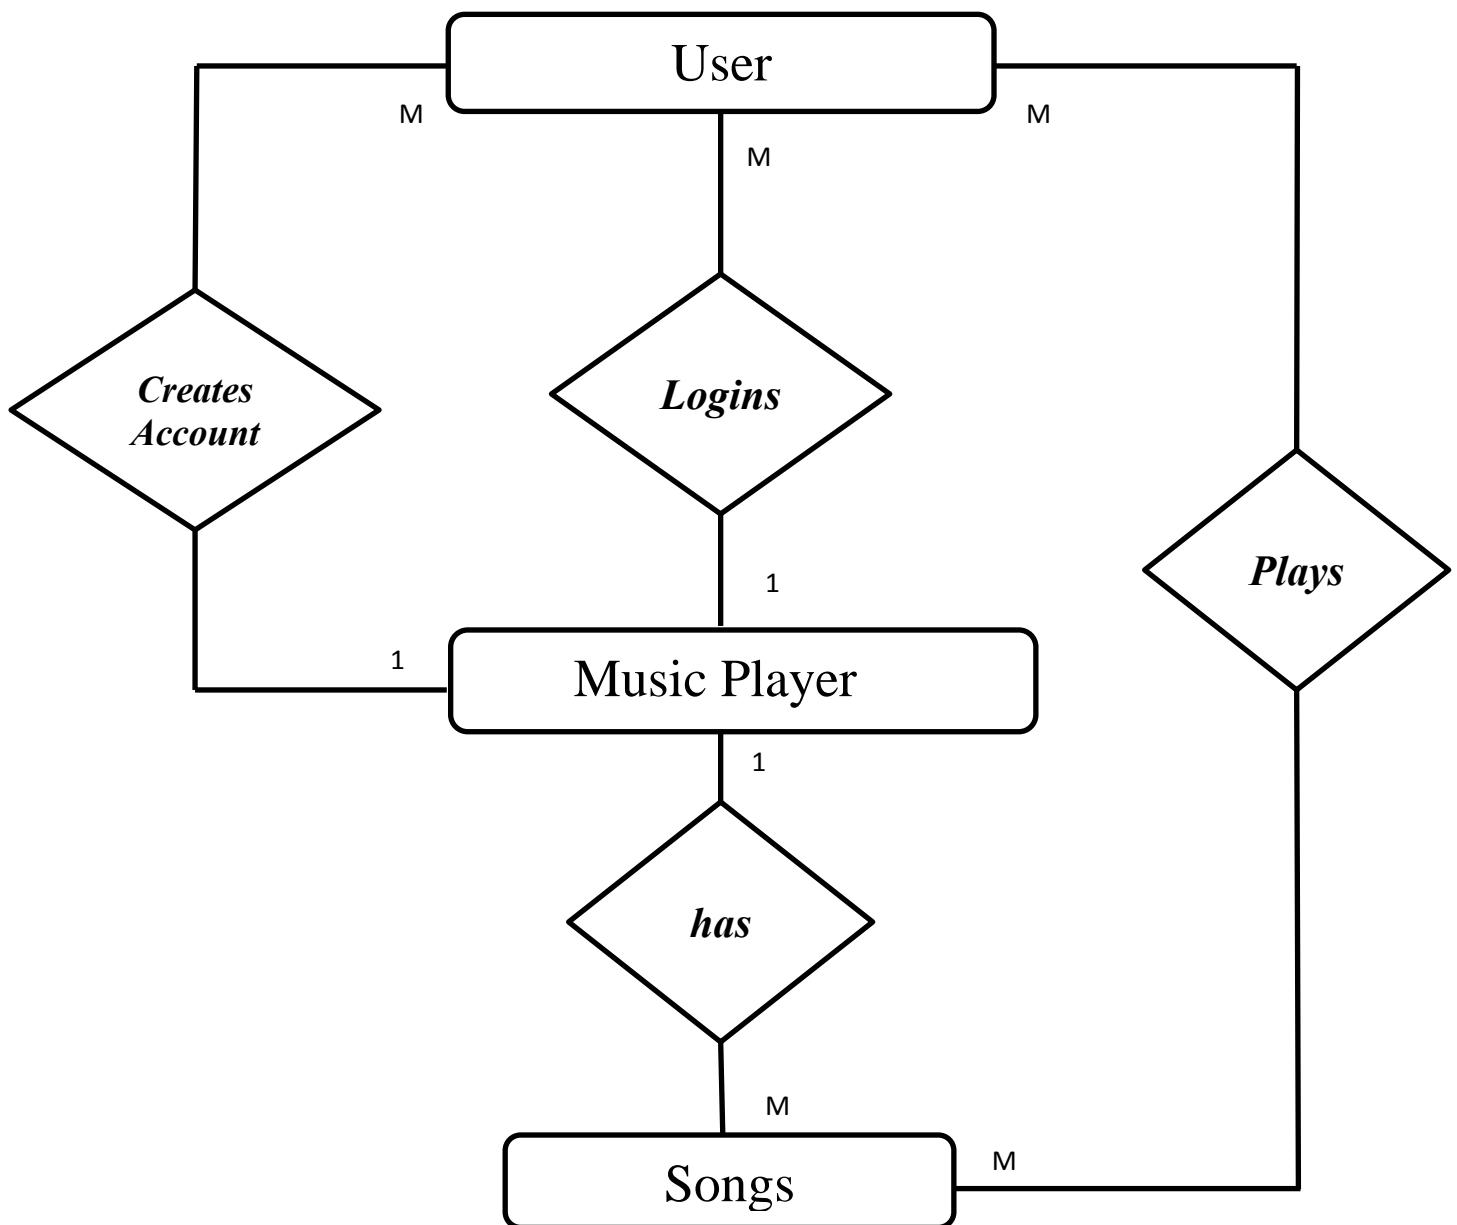

- **8 GB & Above**

Mouse.

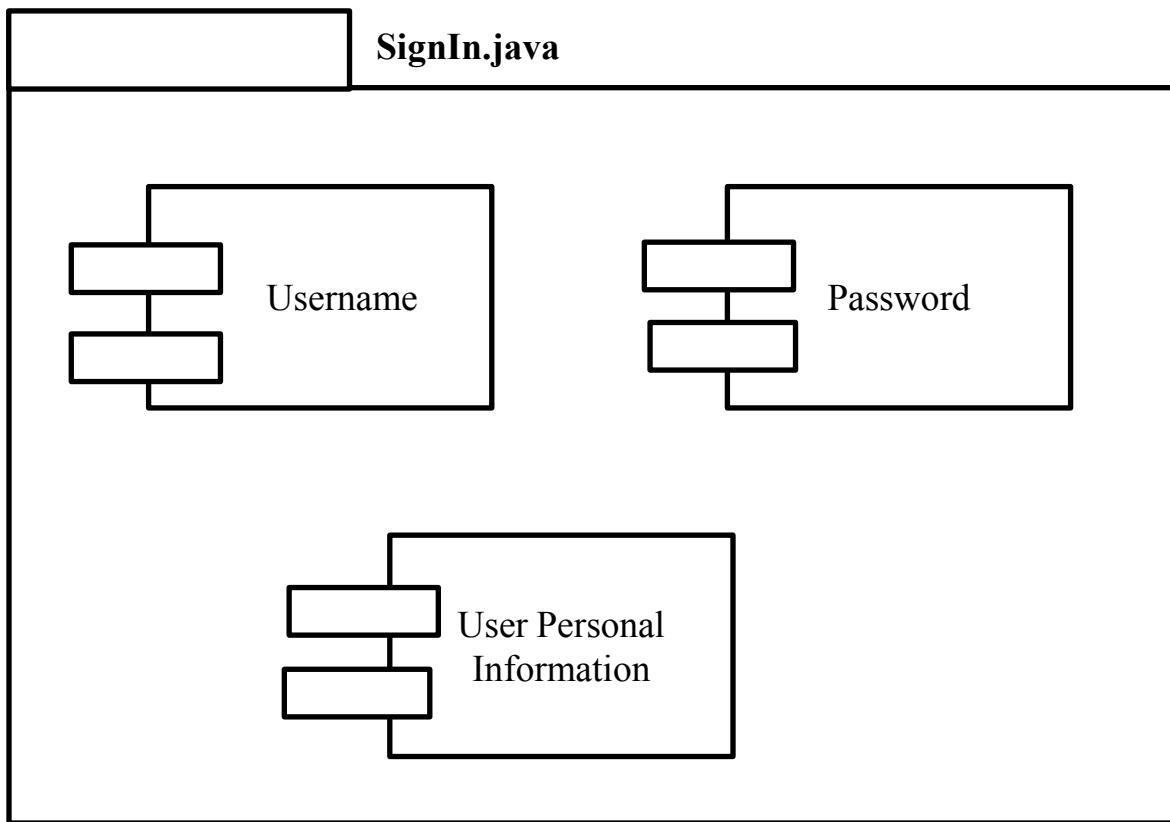

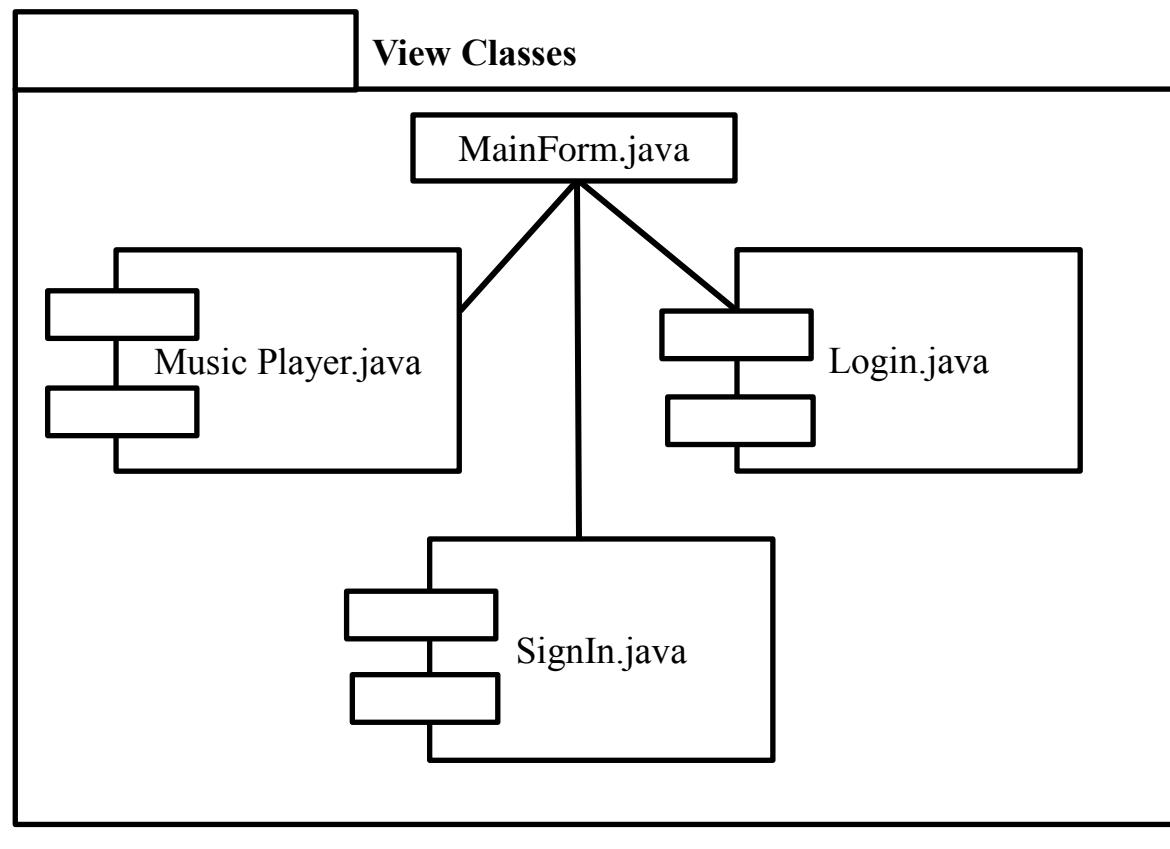

Key-Board.

SCREEN DESIGNS :

1. Main Form :

The screenshot shows the main form of the Jaco Music Player application. The interface is divided into several sections:

- Top Bar:** Displays "Applet Viewer MainForm.class" and "Applet".
- User Profile:** Shows a user icon and the text "Guest".
- Search Bar:** A search input field with a magnifying glass icon.
- Navigation Links:** "My Music", "Recent Plays", "Now Playing", and "Playlists" (with a plus sign).
- Title Bar:** "My Music".
- Tab Bar:** "Songs" (selected), "Artists", and "Albums".
- Control Buttons:** "Shuffle all", "Sort by: Date added", and "Genre: All Genres".
- Song List:** A table showing 10 songs with columns: Song Name, Artist, Album, Year, and a download icon. The songs listed are:

Song Name	Artist	Album	Year	Action
Khamoshiyan - Khamoshiyan (Arijit Singh...)	Arijit Singh	Khamoshiyan	2010	Download
Justin-Bieber-Sorry-PlayMusicGh.com_1...	Justin Bieber	English	2013	Download
Jee le zara	Jee le zara	Talaash	2012	Download
Alan Walker - Faded	Alan Walker	Faded	2014	Download
Summer Love-One Direction	-----	Summer LOVE	2007	Download
Chunar (ABCD 2) Arijit Singh 320Kbps	Arijit Singh	ABCD@2	2015	Download
Dil Diyan Gallan-(Mr-Jatt.com)	Atif Aslam	Tiger Zinda Hai	2017	Download
Bezubaan	Mohit Chauhan,Priya Panchal	ABCD	2010	Download
Soch_Na_Sake_320_Kbps_(Bestwap.in)	Arijit Singh,Tulsi Kumar	Fifa World Cup (2010 South Africa)	2015	Download
I Love You (Unplugged) - (BossMp3.In)	Shaan	-----	-----	Download
Show Me The Meaning of Being Lonely	@123@	Backstreet Boys	2011	Download
- Player Bar:** Shows the currently playing song ("Soch_Na_Sake_320_Kbps_(Bestwap....") at "10:10", a progress bar, and playback controls (back, play/pause, forward, volume).
- Bottom Bar:** Shows "Applet started."

The screenshot shows a Java applet titled 'MainForm.class' running in an 'Applet' viewer. The title bar includes the title and the word 'Applet'. The main content area has a dark header with 'Jaco Music Player' in white. Below it, there's a login section with 'Username' and 'Password' fields and a 'Log in' button. A 'Forgot password?' link is also present. The main body is titled 'Create a new account' with the sub-instruction 'It's free and always will be.' It contains several input fields: 'First name' and 'Surname' side-by-side; 'Email address'; 'Mobile number'; two masked input fields (one for a date of birth and one for a password); and a 'Birthday' section with dropdown menus for day (1), month (January), and year (1980). There are radio buttons for 'Female' and 'Male'. A small note at the bottom states 'By clicking Create Account, you agree to our terms and conditions.' A large green 'Create Account' button is centered at the bottom. At the very bottom left, there's a small red bar with the number '22'.

4. Profile Form :

ADVANTAGES

Advantages :

- Single Website for Different Languages Songs
- No Unwanted popup
- Quick Play & Download
- Secure & Web application

FUTURE ENHANCEMENT

On the basis of the work done in dissertation entitled “ Online Music Player”, the following conclusions emerge from the development.

- The development of this package has been achieved by using C#.NET, which is very conducive to develop the package with regard to time and specific need to the user.
- This package is highly user friendly, required an optimal minimal input from user while providing highly relevant and focused outputs.
- The system can further extended as per user and administrative requirements to encompass other aspects of connection management for telecom dept.
